Main Band:
DUNE PILOT

BIOGRAPHY:

Inspired by his fathers music collection, Veit already started to hear to rock music as a young child. Throughout his childhood he listened to all types of rock music and learned a lot about music history, so he decided in 2005 to start playing drums. Not far from that point, he started his first band projects including cover rock bands for a start, and later on hard rock bands with self-written songs. Next to playing the drums he discovered a passion for songwriting including composing guitar-riffs and writing vocal melodies alongside with his bandmates.

For the past few years, Veit played in different punk, metal and rock bands around Munich. His main project at the moment is his band „Dune Pilot“, a full power Stoner Rock band from Munich, influenced by different Stoner Rock Bands and other Genres too.

Touring and playing live shows with his band is his passion and a great experience. They always meet new people and learn a lot from other bands while playing support shows, festivals and other events. Learning and sharing from and with other bands is a great deal. Growing in experience and playing as much shows as possible is the most important part for all members of Password Monkey. It's a great incentive to get better and better with every step as a band. Veit and his bandmates want to bring back a little of the 80's rock music style and make people happy with it.
